LEADING CHANGE THROUGH EVALUATION
Improvement Science in Action
Kristen L. Rohanna
This book shows why those hoping to use evaluation to drive change in complex systems, rather than develop or improve one program, policy, or product, need to shift from the oversimplified idea of formative evaluation to a more specified continuous improvement model grounded in improvement science. In doing so, author Kristen L. Rohanna provides guidance to both evaluators and others, such as K-12 educators or hospital administrators, who lead improvement initiatives in their organizations and seek to solve persistent problems of practice.

COMPLETING YOUR QUALITATIVE DISSERTATION
A Road Map From Beginning to End
Linda Dale Bloomberg
Addressing the key challenges facing doctoral students, this text fills a gap in qualitative literature by offering comprehensive guidance and practical tools for navigating each step in the qualitative dissertation journey, including the planning, research, and writing phases. Author Linda Dale Bloomer blends the conceptual, theoretical, and practical, so that the book becomes a dissertation in action - a logical and cohesive explanation and illustration of content and process.

CRAFTING QUALITATIVE RESEARCH QUESTIONS

A Prequel to Design
Elizabeth (Betsy) Baker, President

The essence of research design is the ability to articulate research questions. This book dissects the anatomy of a qualitative research question, outlines the role of paradigms in research design, describes strategies to use the anatomy as a design heuristic, and provides sample cases that track the decisions two researchers made while formulating a qualitative question. The book concludes with advice on how to move from the research question to the proposal.

CONFIRMATORY FACTOR ANALYSIS
J. “Jason” Micah Roos, Shawn Bauldry

Measurement connects theoretical concepts to what is observable in the empirical world, and is fundamental to all social and behavioral research. In this volume, J. Micah Roos and Shawn Bauldry introduce a popular approach to measurement: confirmatory factor analysis, with examples in every chapter drawn from national survey data. Data to replicate the examples are available on a companion website, along with code in R, Stata, and Mplus.

ANALYZING TEXTUAL INFORMATION
From Words to Meanings through Numbers
Johannes Ledolter, Lea S. VanderVelde

Researchers in the social sciences and beyond are dealing more and more with massive quantities of text data requiring analysis, from historical letters to the constant stream of content in social media. Traditional texts on statistical analysis have focused on numbers, but this book will provide a practical introduction to the quantitative analysis of textual data. Using up-to-date R methods, this book will take readers through the text analysis process, from text mining and pre-processing the text to final analysis.

USING TIME SERIES TO ANALYZE LONG-RANGE FRACTAL PATTERNS
Matthijs Koopmans

This book presents methods for describing and analyzing dependency and irregularity in long time series. Irregularity refers to cycles that are similar in appearance, but unlike seasonal patterns more familiar to social scientists, repeated over a time scale that is not fixed. Until now, the application of these methods has mainly involved analysis of dynamical systems outside of the social sciences, but this volume makes it possible for social scientists to explore and document fractal patterns in dynamical social systems.

RESEARCH DESIGN
Why Thinking About Design Matters
Julianne Cheek, PhD, Elise Øby
Designing research is about making decisions to transform an idea into a plan that can provide answers to a research problem or question. The text engages in a dialogue with the student reader, providing a serious, but accessible introduction to research design. Julianne Cheek and Elise Øby show that designing research is an iterative and reflexive process in which there is constant thinking through, and re-visiting of, decisions about that design as it develops.
