Welcome...

Welcome to the 2014 Criminology catalogue. In the following pages you will find details of SAGE’s exciting new publications as well as our classic and bestselling titles.

SAGE prides itself on being able to support students at every stage of their course. Our range of titles spans introductory textbooks, higher-level works, and books that students can come back to each year of their studies and beyond. In 2014 we are delighted to present new editions of some of our bestselling titles including John Muncie’s Youth and Crime Fourth Edition, Yvonne Jewkes’ Media and Crime Third Edition, and Pamela Davies, Peter Francis and Chris Greer’s Victims, Crime and Society Second Edition. Don’t forget that our texts are also available as ebooks, and do look out for the companion websites that accompany many of our books to support both teaching and learning.

SAGE is internationally renowned for our high-quality, award-winning reference programme and in 2014 we are pleased to be publishing David Canter’s Criminal Psychology and James Sheptyki’s Transnational Organized Crime. You will also find details about our field-leading journals within.

We hope you enjoy the range of books and would love to receive your feedback – contact details can be found on the page opposite. If you would like to discuss writing a book for SAGE please contact our Editor, Natalie Aguilera.

This catalogue includes only our most recent and popular titles so please visit our website at www.sagepub.co.uk where you can find full details of all of our books, journals and electronic products. You can sign-up for new product alerts to keep you up to date with our latest books, and table of contents alerts so you are informed of new journal issues as soon as they publish. We hope you enjoy reading our books and journals throughout 2014 and beyond.

THE SAGE DICTIONARY OF CRIMINOLOGY
Third Edition
Edited by Eugene McLaughlin City University, London and John Muncie The Open University

Criminology has its own, special language and it can be confusing even to experienced criminologists. This Third Edition of The SAGE Dictionary of Criminology is an indispensable tool for interpreting and navigating this ever-changing field, with packed and theoretically weighty entries written by the original researchers and theoreticians themselves. Essential for teaching, studying and doing this thing we call criminology.

- Shadd Maruna, Professor of Justice Studies, Queen’s University, Belfast

Now in its Third Edition, this bestselling reference text has established itself as the authoritative source covering the key concepts, theories and methods in criminology and criminal justice. Edited by two of the leading figures in the field, the book:

- contains over 300 entries: everything students come across on their course is covered and so it can be used as resource throughout the whole of their course
- is comprised of precisely defined concepts: students are equipped with a clear understanding of the history and development of each topic discussed
- includes further reading to extend students’ knowledge and make it easy for them to read around the topic
- is interdisciplinary: each entry maps connections across various fields and issues, allowing students to see how the topics relate to other disciplines
- features contributions from internationally renowned academics and practitioners, making the book global and comparative throughout.

CRIMINOLOGICAL PERSPECTIVES
Essential Readings
Third Edition
Edited by Eugene McLaughlin City University, London and John Muncie The Open University

Criminological Perspectives remains the most authoritative collection of criminological classics. Now in its third edition, it has been updated to reflect many of the global risks and harms that contemporary criminology is concerned with. Eugene McLaughlin and John Muncie have successfully navigated a complex theoretical and conceptual landscape and made it intelligible for students and established scholars alike.

In addition to including essays which have had a seminal influence on the development of criminology, Crimino logical Perspectives reflects on the range of criminological thinking in the 21st century. Wide-ranging and global in scope and coverage, this book will enable students to engage with the key concepts, theoretical debates and empirical issues that they will encounter throughout their studies.

This Third Edition:

- provides students with a one-stop resource to help them expand their reading and critically engage with their course and the topics they are studying
- covers all of the most significant theoretical and empirical work in the field, making it a resource that students can rely on and use throughout the whole of their degree
- enables students to see how the topics they are learning about relate to, and are in conversation with, other disciplines due to the editors choosing readings for each part which are in conversation with each other and which span disciplines
- is fully up to date with an entirely new part on global transformations, as well as new readings on topics of contemporary criminological significance including anomie theory, social-harm theory, surveillance studies, security studies, environmental studies and governmentality studies.

The 56 articles are organized thematically, complete with introductions that place them in context and illustrate the approaches taken by different schools of criminological thought.

CRIMINOLOGICAL THEORY

Context and Consequences
Sixth Edition

J Robert Lilly Northern Kentucky University, Francis T Cullen University of Cincinnati and Richard A Ball Pennsylvania State University, Fayette

Praise for the previous edition:

“A first-class text; clear, concise well written and comprehensive. One of the best criminalological theory text books I have come across. Essential reading for undergraduate students”
- Ms Helen Arnold, Social Science, University Campus Suffolk

This new edition will continue to offer a rich introduction to how scholars analyze crime in a clear, accessible text which moves readers beyond common-sense knowledge of crime to a deeper understanding of the importance of theory in shaping crime control policies. This thoroughly revised edition covers traditional and contemporary theory within a larger sociological and historical context.

Key features include:
- diverse coverage of major criminological theories including perspectives ranging from biosocial theories to cultural criminology
- the development of theories is covered within a broader sociological and historical context
- the authors explore policy implications and applications
- a unique chapter on white-collar crime is indicative of the comprehensive theory coverage offered in the book.

CRIMINOLOGICAL THEORY: A TEXT/READER

Second Edition

Stephen G Tibbetts California State University, San Bernardino and Craig Hemmens Washington State University

This text/reader includes both a collection of key articles on criminalology that have previously appeared in a number of leading criminology/criminal justice scholarly journals, along with authored textual material that presents the basic concepts, data, and explanations of the theories presented.

Key features include:
- a ‘How to Read Research Articles’ guide that follows the book’s introduction and precedes the first reading
- every section has an authored introduction to provide the basic issues and context for the readings that follow
- each authored section introduction concludes with a discussion of policy implications related to the theories covered which is then linked to the book’s concluding Section, ‘Applying Criminological Theory to Policy’
- a study site that includes study and internet resources along with additional edited readings. Instructor resources include test questions, PowerPoint slides and teaching tips.

CRITICALLY ISSUES IN CRIME AND JUSTICE

Thought, Policy, and Practice
Second Edition

Edited by Mary Maguire and Dan Okada both at California State University, Sacramento

Providing an overview of the criminal justice and criminology curriculum through contributed essays, this text explores and examines theory, cases, laws and policies as they have been shaped by a larger social, cultural, and historical context. Topics covered include: crime theory; law enforcement; jurisprudence; corrections; and organizations. Each topic category includes a presentation of historical and contemporary material to illustrate the breadth of research, policy and practice implications of each. This new edition features new chapters on: wrongful convictions; victimology; gangs; comparative criminal justice; and drug/sex trafficking.

DOING CRIMINOLOGICAL RESEARCH

Second Edition

Edited by Pamela Davies, Peter Francis both at Northumbria University and Victor Jupp

Just what students need. A reliable, practical and sensible guide to research methods as applied to criminological questions.

- Professor Tim Newburn, London School of Economics

THEORIZING CRIME AND DEVIANCE

A New Perspective

Steve Hall Social Futures Institute, University of Teesside

This sophisticated, original book from a leading authority, Steve Hall, critiques the philosophies and political issues that have informed criminological theory, and explores the roots and applications of existing theories. It then sets out a new, multidisciplinary perspective for social theory.

THE NURTURE VERSUS BIOSOCIAL DEBATE IN CRIMINOLOGY

On the Origins of Criminal Behavior and Criminality

Edited by Kevin M Beaver Florida State University, J C Barnes The University of Texas at Dallas and Brian B Boutwell Sam Houston State University

This book facilitates an open and honest debate about criminal behaviour between the more traditional criminologists who focus primarily on environmental factors and contemporary biosocial criminologists who examine the interplay between biology/genetics and environmental factors. It provides a contemporary approach by bringing to the table a new debate: nurture vs. biosocial.

Ronet Bachman University of Delaware and Russell K Schutt University of Massachusetts, Boston

This book provides helpful and extensive coverage of a large number of the elements of the research process. A text using Criminological examples is particularly helpful in seeking to demonstrate to Criminology students that methods are central to the subject that they are studying.

- Jamie Harding, Division of Sociology & Criminology, Northumbria University

NEW EDITION!

FUNDAMENTALS OF RESEARCH IN CRIMINOLOGY AND CRIMINAL JUSTICE
Third Edition
Ronet Bachman University of Delaware and Russell K Schutt University of Massachusetts, Boston

A concise resource for understanding the multifaceted subject of research methods in the field of criminology and criminal justice, this book helps to teach research design and techniques within the context of substantive criminology and criminal justice issues of interest to students and the field. This is a briefer version of Ronet and Russ’s successful The Practice of Research in Criminology and Criminal Justice, written in a less formal style, with more concise examples drawn from everyday experience, and less coverage of complex or more rigorous methods.

Features of the Third Edition:
- the examples throughout the book integrate substantive criminal justice issues with research with a greater emphasis on the major branches of the criminal justice system
- integrates policy and policy implications for research methods throughout the text
- integrates coverage of ethics throughout, with a chapter devoted to the topic and end-of-chapter sections discussing ethics in the context of the chapter topics
- contains extensive, updated exercise sets that include practice exercises, web research activities, SPSS exercises, developing a research report activities
- includes a robust student study site which includes GSS data sets, appendixes on using quantitative and qualitative software, a demo for HyperResearch’s qualitative analysis software, a sample research proposal, as well as a variety of interactive exercises.

THE PENAL SYSTEM

An Introduction

Fifth Edition

Michael Cavadino University of Central Lancashire, James Dignan formerly Professor of Comparative Criminology and Criminal Justice at the University of Leeds and George Mair Liverpool John Moores University

From its original publication onwards, The Penal System has proved itself a sure and authoritative guide to the post-war history and character of the penal system of England and Wales. Unrivalled as a textbook on the subject, its authors, now strengthened by the addition of George Mair, combine the analysis of trends with a clear sense of narrative and an eye for the telling detail. It is a masterly achievement, invaluable for students and teachers alike.

- David Downes, Professor Emeritus of Social Policy, The Mannheim Centre for Criminology and Criminal Justice, London School of Economics

Consolidating and building on the successful formula of the fourth edition, this new edition brings the text in line with the key issues facing the criminal justice system today, the book:

• features expanded material on restorative justice and gender and the criminal justice system
• has greater coverage of comparative issues, focussing especially on Scotland
• continues to provide critical coverage of the deepening penal crisis, including sections on the managerial crisis and the crisis of accountability
• is a text that, even more so now given the three points above, students and lecturers can rely on to provide complete, up-to-date and authoritative coverage of this area
• is accompanied by an updated companion website which has information on all key legislative developments, official reports and links to relevant websites to help students expand their reading on the field. The site also includes lecture slides and seminar notes.

The SAGE Handbook of Punishment and Society
Edited by Jonathan Simon University of California, Berkeley and Richard Sparks University of Edinburgh

The editors - who have themselves done much to shape the field - have succeeded in producing a volume written in a clear, erudite, yet pacey style throughout.

The SAGE Handbook of Punishment and Society is hugely impressive in its range and sophistication and is a very welcome addition to the field.

- Yvonne Jewkes, Professor of Criminology, University of Leicester

This is a definitive resource that illuminates some of the key themes in this complex area - from historical and prospective issues to penal trends and related contributions through theory, literature and philosophy. Incorporating a stellar and international line-up of contributors, the book addresses issues such as: capital punishment; the civilization process; gender; diversity; inequality; power; human rights; and neo-liberalism.

CRIMINOLOGICAL AND FORENSIC PSYCHOLOGY

Helen Gavin University of Huddersfield

Criminological and Forensic Psychology is a new, theoretically rigorous, practically relevant, engaging and fun introduction to this broad and fascinating field. It covers both the conceptual basis within which psychology knowledge is applied in forensic contexts and the practical applications of psychology to the criminal civil justice systems.

The book includes:

• case studies, such as the James Bulger investigation in Chapter Five, woven into every chapter to bring the topic to life and encourage the application of knowledge by placing you in the full context of a criminal case, showing you how psychological theories can be used to explain real-life crimes
• in-depth exploration of the fascinating courtroom process including separate chapters on the defendant’s mind and the jury.
• a dedicated chapter on research methods specific to forensic psychology to help you do your research project around this topic.

A companion website is provided to support learning and includes chapter-by-chapter multiple-choice questions to test understanding of the topic, additional case studies to reinforce learning, and links to further readings to continue your exploration of the subject.

Perspectives on Crime

NEW!

DRUGS, CRIME AND JUSTICE

Steven Belenko Temple University and Cassia C Spohn Arizona State University

Providing an analysis of the interrelationships among drug use/abuse, crime and justice, this book focuses coverage on all sides of the issues, including coverage of the transnational drug trade.

Key features include:
- numerous case studies to highlight key or notorious criminal cases related to drugs and crime
- ‘Focus on an issue’ boxes that highlight current controversies, such as the disparity in punishment for crack and powder cocaine, the prosecution of pregnant women for abusing illegal drugs, and the unintended consequences of the war on drugs
- frequent use of tables, figures and photos to make the book more applied and accessible for students
- chapters conclude with a case study to enhance students’ critical thinking as they discuss the policy and justice implications of the cases presented.

MENTAL ILLNESS AND CRIME

Robert A Schug and Henry F Fradella both at California State University, Long Beach

This is a comprehensive summary and critical examination of the relationship of mental illness in general, and individual psychiatric disorders in particular, with criminal, violent, and other forms of antisocial behaviour. It incorporates an interdisciplinary, integrative approach toward presenting explanations for and etiologies of mental illness-related criminal and violent behaviours. In addition, the text critically examines what is known about the treatment and social implications of this body of research, including its practical applications within the criminal justice system.

Key features:
- each disorder chapter features ‘Origins of Crime and Violence’ sections presenting potential theoretical explanations and proposed etiological mechanisms specific to the disorders covered
- each chapter begins with a high-profile case to engage the reader
- a ‘Closer Look’ feature provides data to illustrate the relationship between the disorders and crime
- DSM V is introduced throughout, especially in tables for each disorder that compares and contrasts the disorder’s classification in both DSM IV and DSM V
- chapters include relevant case studies in boxes to help foster application to real-world circumstances.

was informed by empirical research or by knowledge of the Media Studies
space. It seems hard to believe but when the First Edition was published in 2004, Facebook was just one of many emerging social networking sites competing for attention (it quickly beat off the likes of MySpace and Bebo) and Twitter hadn’t yet been invented. Young people are now moving on from these sites to new photo messaging apps. It’s hard to keep up with the fast-moving world of communication, especially

What made you first want to write Media & Crime?
I had taught both Media Studies and Criminology at various stages in my career and I felt that at the time (15 or 20 years ago) there were very few criminologists writing about the media in a way that was informed by empirical research or by knowledge of the Media Studies literature. I had been taught at the University of Leicester by some of the great names in Media and Communications before starting my career in Criminology and I always tried to keep the two interests running side-by-side, including writing my doctoral thesis on media in prisons (published as Captive Audience in 2002) and establishing the SAGE journal Crime, Media, Culture with Chris Greer and Jeff Ferrell in 2005. It just seemed that a good introductory book on media and crime was needed and I felt I could write it.

What do you hope that readers will gain from reading the book?
Although the book aims to offer a way into the media-criminology literature and is introductory in the sense that it provides an overview of the field, it is also intended to be challenging and to encourage students to think about the relationship between crime and media in different ways. Like all the books in the ‘Key Approaches to Criminology’ series, Media and Crime aims to be a valuable teaching resource, mapping onto 3rd year undergraduate and postgraduate modules in media and crime, but also to inspire new research among dissertation students and established academics.

What changes can readers expect in the new, Third Edition?
The book sells well worldwide so the Third Edition will be more international in scope. It will also be updated with recent developments in media technology. It seems hard to believe but when the First Edition was published in 2004, Facebook was just one of many emerging social networking sites competing for attention (it quickly beat off the likes of MySpace and Bebo) and Twitter hadn’t yet been invented. Young people are now moving on from these sites to new photo messaging apps. It’s hard to keep up with the fast-moving world of communication, especially
given the time it takes for a book to be published, so the challenge is to give a flavour of the evolving mediascape with every new edition of the book.

Which particular topic/area in the book do you find the most fascinating?
I’ve always been interested in news values – the factors that determine a story’s newsworthiness. I’m particularly interested in the ways that different countries’ media report the same story (I recently wrote a chapter with Rinella Cere and Thomas Ugelvik which explored how the killing of 77 people in Oslo and on Utøya island in 2011 was reported in subtly different ways by the British, Italian and Norwegian media). We tend to think of news events in terms of homogeneous, global reporting but actually the selection and narrative of stories can be quite parochial – for example, few Media/Crime students in the US have heard about the abduction of Madeleine McCann.

Apart from the book, what are you currently working on?
I have just started an ESRC-funded, 3-year research project on prison architecture, design and technology with Dominique Moran, a carceral geographer working at the University of Birmingham. It is a comparative, European study looking at whether prison architecture and design can have rehabilitative impacts. There are several architecturally imaginative prisons being planned and built in northern Europe and, in a nutshell, we are interested in whether humane, sensuous design is beneficial to prisoners’ quality of life or whether it makes little difference to the experience of losing one’s freedom. It’s an interesting topic from a media ‘point of view’ too – most people don’t ever come into direct contact with a prison but there are plenty of ideas in circulation about what prisons are like, many of which are pretty wide of the mark.
CRIME AND THE ECONOMY

Richard Rosenfeld University of Missouri, St Louis and Steven F Messner State University of New York at Albany

In five brilliant chapters, world-leading criminologists Richard Rosenfeld and Steven F Messner explore issues from market morality to welfare policies. With their trademark mastery of theoretical tools and empirical data, they provide a stunning overview of ideas and research, and impress with fresh insights into a classical problem of criminology. This book will fascinate students as much as advanced researchers.

- Susanne Karstedt, Professor of Criminology, University of Leeds

This unique and timely book explores the connections between crime and economic conditions. The authors skilfully draw on influential criminological theories to formulate an original ‘institutional’ perspective. This perspective sheds light on the complex ways in which levels and forms of crime reflect the structure and functioning of the economy in advanced capitalist societies.

The book offers a readable, interesting and accessible analysis, addressing an array of different criminal activities, including:

- violent crime
- drug crime
- white-collar crime
- organised crime
- fraud
- corporate crime.

CYBERCRIME

AND SOCIETY

Second Edition

Majid Yar University of Hull

This is very useful text and is ideally pitched at undergraduate students (and staff teaching at this level) with an interest in crime and the discourses of crime as they are applied to electronic communications. The author never loses sight of the reader and helpfully explains key terms and terminology, and also provides helpful prompt questions for further study.

- Robert Jewitt, Art, Design and Media, University of Sunderland

Cybercrime is a complex and ever-changing phenomenon. This book offers a clear and engaging introduction to this fascinating subject by situating it in the wider context of social, political, cultural and economic change. Taking into account recent developments in social networking and mobile communications, this new edition tackles a range of themes spanning criminology, sociology, law, politics and cultural studies, including:

- computer hacking
- cyber-terrorism
- piracy and intellectual property theft
- financial fraud and identity theft
- hate speech
- internet pornography
- online stalking
- policing the internet
- surveillance and censorship.

Another crackdown was promised with curfews, ‘shock tactics’, more police, increased ‘pay back’ sentencing powers and more prisons advocated as the means to mend ‘our broken society’. Adult fear of, and obsession with, youth, crime and disorder appeared unrelenting. Five years on from the Third Edition, and in the midst of the austerity politics of a Conservative/Liberal Democrat coalition government, the landscape of youth crime and youth justice appears subject to another confrontation. Notwithstanding the media and political furore following the 2011 riots and recurring fears of ‘teen gangs’, there have been notable declines in recorded youth offending, court appearances and youth custody rates. Fiscal pressures and scarcity of resources appear to have encouraged a drawback from some of New Labour’s more prescriptive and expensive forms of intervention. As a result, the law and order climate (at least as far as young offenders are concerned) appears less frenetic than a decade ago. It remains open to conjecture whether this heralds a long term progressive future of decriminalisation and deinstitutionalisation, or a wholesale abandonment of recognising young people’s needs and rights.

What inspired you to first write this book?

I wrote the First Edition of Youth & Crime in 1998. It was inspired by the then contemporary panic about ‘child killers’, ‘superpredators’ and persistent young offenders that dominated the law and order agenda in the UK. The first secure training centre for 12 to 15 year olds had just opened and the entire structure of youth justice in England and Wales was in the process of radical reform as a result of the flagship legislation, the Crime and Disorder Act.

In what ways has the field evolved since you wrote the first edition?

In 2003, I wrote the Second Edition of Youth & Crime amidst another set of concerns about street crime and anti-social behaviour. The Anti-social Behaviour Act with its powers of dispersal and ‘naming and shaming’ had just received Royal Assent. In the summer of 2008 at the time of the third edition, it was ‘hoodies’, youth gangs and knife crime that headed the nation’s concerns. Another crackdown was promised with curfews, ‘shock tactics’, more police, increased ‘pay back’ sentencing powers and more prisons advocated as the means to mend ‘our broken society’. Adult fear of, and obsession with, youth, crime and disorder appeared unrelenting.

What’s new to this Fourth Edition?

Why do you believe the study of youth and crime is important?

It’s important to place youth crime in a broad context in which it is acknowledged that the most serious harms afflicting society are clearly not perpetuated by young people at all. Any serious analysis must also confront the issue of why certain aspects of young people’s behaviour are singled out as particularly problematic and in what circumstances they are considered as deserving a criminal justice-based rather than a social welfare-based response. It’s also necessary to explore the nature of adult reaction – whether this is grounded in protection, anger, resentment, philanthropy, fear, vengeance, child hatred or ambivalence.

What would you like to say to lecturers adopting your book?

This book is designed to encourage students to adopt a critical understanding of the array of political talk, media stories, government initiatives and academic research about young people with which we are all familiar. It draws upon a wide range of scholarly work derived from social history, politics, social policy, psychology, law, sociology and cultural studies, as well as criminology, to offer a comprehensive overview of current debates in youth, crime and justice. It also incorporates a wide range of useful study tools – from chapter outlines and summary boxes to a glossary of key terms – to make it fully accessible to both undergraduate and postgraduate students.

PERSPECTIVES ON DEVIANCE
AND SOCIAL CONTROL
Michelle L inderbitzin Oregon State University, Kristin A Bates California State University, San Marcos and Randy Gainey Old Dominion University, Norfolk
Looking at deviant behaviour and social control, this text covers the essential and major topics in a concise and readable manner while presenting an overview of the sociological theories of deviance and societal response to deviant behaviour. The authors briefly explain the development of major sociological theoretical perspectives and use current research and examples to show how those theories are used to think about and study the causes of deviant behaviour and the reactions to it.

The book:
• offers a very contemporary take on the sociological perspectives used to evaluate deviant behaviour and the reactions to it
• features ‘Deviance in Popular Culture’, ‘Studies in Deviance’, and ‘Now YOU...’ text boxes
• has a chapter on international perspectives on deviance and social control which describes various international perspectives and how they relate to several theories, as well as how sociologists have used international perspectives to understand forms of deviance at several levels of analysis
• is accompanied by a student study site with self-quizzes, video clips and SAGE research articles.

SEXUAL VICTIMIZATION
Then and Now
Edited by Tara N Richards University of Baltimore and Catherine D Marcum Appalachian State University
Providing information that specifically examines the continuum of sex crimes as well as how the victims of such crimes have been perceived, this text includes research on sexual victimization to help educate students on this complex and evolving challenge for the criminal justice system.

The approach of the book offers readers a comprehensive examination of the sexual victimization issues and challenges currently facing the criminal justice system in the past and today. By discussing these issues, the theoretical explanations for these crimes and the effectiveness of the policy that has been applied will effectively link the criminological areas of theory, research and policy.

Paper (978-1-4522-5839-3) • £40.99

NEW!
This book provides a thorough account of victimisation across the social spectrum of class, race, age and gender. Covering theoretical, social and political contexts, the book:

- includes new chapters on defining and constructing victims, fear and vulnerability, sexuality, white collar crime and the implications of crime policy on victims
- examines a global range of historical and theoretical perspectives in victimology and features a new chapter on researching victims of crime
- reinforces students’ learning through critical thinking sections, future research suggestions, chapter summaries and a glossary of key terms
- now includes a companion website, complete with links to relevant journal articles in victimology.

Victims, Crime and Society is the essential text for your studies in victimology across criminology, criminal justice, community safety, youth justice and related areas.

**Why a Second Edition?**

The first was extremely well received and continues to be a very widely used text at undergraduate level. Seven years on there are updates to be made, additional chapters to be commissioned and we feel there is plenty more to say about victims, crime and society.

**What new additions should readers look out for in this new edition?**

There are seven new chapters, 18 chapters in total making this a truly new edition. Readers should look out for completely new contributions on fear, vulnerability, gender, sexuality and victimization, global perspectives on victimization and victimizations by the powerful. All remaining original chapters have been re-written and fully updated, with a new introduction, section parts and glossary.

**What makes your book different to other Victimology textbooks?**

Our book comprehensively addresses all the various intersecting and overlocking socio-economic, comparative and historical dimensions to victimization in society. It is replete with pedagogic features that make it attractive to students and to those involved in innovative ways of teaching and learning.

**What advice would you give to students studying Victimology?**

Read, read, read and then read some more – starting with this book!

**How do you see the field evolving over the next 5 years?**

The study of the victim of crime has been emerging within the discipline of criminology since each of us has been involved in teaching at undergraduate level. Over the next five years we expect to see victimology becoming more core to the discipline of criminology yet we expect to see the field continue to be contested, challenging the heart of the discipline as we debate the nature, extent, scope and landscapes of victimization, social harm and injustice across the globe into the twenty-first century.

TRANSNATIONAL ORGANIZED CRIME
Four-Volume Set
Edited by James Sheptycki
York University, Toronto

Transnational Organized Crime (TOC) has emerged as a major idea in the conceptual field of global governance. Studies of TOC intersect with disparate criminological issues inhabiting apparently different domains: comparative criminal justice, migration studies, transnational policing and the political sociology of crime, to name just a few. The four-volume structure of this major work enables coverage of the historic development of its conceptualization, critical definitional and socio-political issues, empirical case studies and realist formulations of the problem area as well as theoretical, normative debates, alternative conceptual formulations and policy choices. Each volume will contain an introduction that will introduce the main themes and contextualize the selections.

Volume One: Definitions and Theories
Volume Two: Origins, Resources, Organization
Volume Three: Organized Crime and the Penetration of Markets
Volume Four: Organized Crime and Popular Culture, States and Terrorism

GLOBALIZATION AND CRIME
Three-Volume Set
Edited by Katja Franko Aas
University of Oslo

This new major work shines a spotlight on key criminological themes in the study of transnationalism and globalization, and, through a selection of the established literature on the subject along with more contemporary writing, explores how globalization is defined, researched and debated within criminology.
