THE SOCIOLOGY OF CHILDREN, CHILDHOOD AND GENERATION

Madeleine Leonard
Queen’s University Belfast

Outlining sociology’s contribution to childhood studies and our understanding of contemporary children and childhood, this book provides a thought-provoking and comprehensive account of the connections between the macro worlds of childhood and the micro worlds of children’s everyday lives.

Examining children’s involvement in areas such as the labour market, family life, education and leisure, it balances understanding childhood as a structural phenomenon, and recognizing children as meaning makers involved in constructing, co-constructing and reconstructing their everyday lives.

Through the concept of ‘generagency’, Madeleine Leonard offers a model for examining how structure and agency are activated within interdependent relationships influenced by generational positioning. This framework provides a conceptual tool for thinking about the continuities, challenges and changes that impact on how childhood is lived and experienced.

CRAYONS AND IPADS

Debra Harwood
Brock University

Crayons and iPads examines the use of digital technology in the early stages of child development and the way in which learning techniques have evolved in classrooms across the world.

Taking the position that tablets provide an accessible learning and instructional tool, Debra Harwood explores how tablets can be used to provoke, ignite and excite children’s interest in the world around them, arguing that it is through this engagement with technology that new discoveries are made and learning takes place.

Guiding readers through research-based insights into children’s thinking, interactions and being, Crayons and iPads offers an important starting point upon which to build play and inquiry-based learning opportunities within early learning programs.

INTRODUCTION TO CRIMINOLOGY

Theories, Methods, and Criminal Behavior

Frank E Hagan
Mercyhurst College

Focusing on the vital core of criminological theory - theory, method and criminal behaviour - with more attention to crime typologies than most introductory texts, this book investigates all forms of criminal activity, such as organized crime, white-collar crime, political crime and environmental crime. The methods of operation, the effects on society and policy decisions, and the connection between theory and criminal behaviour are all explained in a clear, accessible manner.

This Ninth Edition has updated coverage of terrorism and counter-terrorism efforts, as well as new coverage of emerging criminological methods, such as ethnographies. All statistics, tables and figures have been updated, as have the photographs, supplements, and audio and video packages in the new edition to make the material most relevant for courses.

ANTI-SOCIAL BEHAVIOUR

A multi-national perspective of the everyday to the extreme

Cate Curtis
University of Waikato

Neatly and succinctly takes readers through ways to understand and interpret the label of “antisocial” behaviour in a wider context, showing how it is socially, historically and culturally produced as well as understood in professional health and policing or correctional contexts

-- Cathy Coleborne, University of Newcastle, Australia

Cate Curtis seeks to disrupt assumptions about anti-social behaviour by bringing together a host of key concepts and theories applicable to the field. Going beyond individualized discussions, the book explores broader concepts such as the social construction of ‘anti-social behaviour’, ‘risk’ and ‘resilience’, and the social contexts and influences under which these are most likely to occur.

This book achieves the rare feat of helping its readers without patronising them. The aids to the reader - tables, boxes, glossaries, questions and suggestions for further reading - will prove genuinely helpful to students and their teachers, but they appear within a text that is theoretically informed as well as comprehensive and up-to-date in its coverage.

- Professor David Smith, University of Lancaster

Providing a thorough account of victimization across the social spectrum of class, race, age and gender, this Second Edition has been fully revised and expanded, with two parts now spanning the key perspectives and issues in victimology.

Covering theoretical, social and political contexts, the book:

- includes new chapters on defining and constructing victims, fear and vulnerability, sexuality, white-collar crime and the implications of crime policy on victims
- examines a global range of historical and theoretical perspectives in victimology and features a new chapter on researching victims of crime
- reinforces learning through critical thinking sections, future research suggestions, chapter summaries and a glossary of key terms
- now includes a companion website, complete with links to relevant journal articles in victimology.

This is an excellent introduction to a topic of central importance for criminologists. It has the merit of being very clearly written, and the authors cover a wide range of materials – theories and data; European and American research; quantitative and qualitative studies. Throughout, they provide helpful examples from their work on the Stockholm Life-Course Project. Highly recommended.

- Sir Anthony Bottoms, Emeritus Wolfson Professor of Criminology, University of Cambridge

Most people engage in crime at some point in their lives, but why does almost everybody stop soon after? And, why do a small number of offenders persist in crime? These two questions constitute the core of the field often known as life-course criminology.

This book covers the dominant theories and methodologies in the field and equips students with all they need to succeed in their studies on the subject. The book:

- discusses the methodologies of life-course and longitudinal research
- explains and critiques the major theories of life-course criminology
- considers the issues of risk, prediction, onset, persistence and desistance of criminal activity
- draws on research from studies in Europe, the UK, US and Australia, including the Stockholm Life-Course Project.

KEY APPROACHES TO CRIMINOLOGY

TRANSLATIONAL CRIME AND CRIMINAL JUSTICE
Marinella Marmo and Nerida Chazal
Flinders University

The scholarship deployed in this book is precise, well researched and the writing style is excellent. In my opinion this text provides a notable contribution to teaching in this area and is also of relevance to scholars and policy makers operating in the policing and criminal justice fields.

AN INTRODUCTION TO GREEN CRIMINOLOGY AND ENVIRONMENTAL JUSTICE
Angus Nurse Middlesex University

Nurse covers the main issues in green criminology in a well-written and brief introductory chapter. He then continues to address a number of varied but extremely interesting and pertinent issues that I think will greatly interest students, as well as those working in regulatory and policy areas, academics, or indeed readers in general... A very highly recommended text.

- Melissa Deary, Senior Lecturer in Criminology, University of Hull

A comprehensive introduction to green criminology, this book is a discussion of the relationship between mainstream criminal justice and green crimes. Focused on environmental harm within the context of criminal justice, this book takes a global perspective and:

Steve Fuller University of Warwick

Understanding the Value of Social Science in Today’s World

BIG IDEAS IN SOCIAL SCIENCE
David Edmonds BBC World and Nigel Warburton The Open University

Are human beings less violent than before? Why do we adopt certain moral and political judgements? Why is the gap between rich and poor getting bigger? How do we decide which criminal policies are effective? What is the Population Challenge for the 21st Century? What is social science?

In Big Ideas in Social Science, David Edmonds and Nigel Warburton put these and more of our society’s burning questions to 18 of the world’s leading social scientists including Steven Pinker, Ann Oakley, Lawrence Sherman, Kate Pickett, Robert J. Shiller and Doreen Massey.

The interviews for this book are based on the Social Science Bites series of podcasts, which can be freely accessed at www.socialsciencespace.com, and subscribed to via iTunes. Social Science Bites was inspired by the popular Philosophy Bites podcast (www.philosophybites.com), which was founded by David and Nigel in 2007 and has so far had 26 million downloads.

EXAGGERATED CLAIMS?
The ESRC, 50 Years On
David Walker

What is the role of the state in distributing research money? How do ‘arm’s-length’ funding agencies relate to public policy and business? This original study looks at the main social science funding agency in the UK, which was established 50 years ago. It examines how funding decisions are related to power. Walker asks the tricky question, why has social science research not achieved a more salient role in state policy formation and management strategy; is the funding agency responsible?

Insightful, engaging and highly original, the book will be required reading for anyone who has written or will write a social science research bid and, more widely, for students of power, knowledge and culture.

THE SAGE HANDBOOK OF RESISTANCE

Edited by David Courpasson
Emlyon Business School, and Steven Vallas
Northeastern University

Occupy, Indignados, The Tea Party, The Arab Spring and Anonymous - these and other terms have become part of an emerging lexicon in recent years, signalling an important development that has gripped many parts of the world. However, resistance and its conceptual ‘companions’, protest, contestation, opposition, disobedience and mobilization, all seem to be still mostly seen in public and private discourses as illegitimate and problematic forms of action.

The SAGE Handbook of Resistance offers theoretical essays enabling readers to forge their own perspectives of what is resistance, and emphasizes the empirical and experiential dimension of resistance - making strong choices in terms of how contemporary topics related to resistance help to rethink our societies as ‘protest societies’.

DEVELOPMENT AND SOCIAL CHANGE
A Global Perspective
Sixth Edition
Philip McMichael Cornell University

Philip McMichael describes a world undergoing profound social, political, and economic transformations, from the post-World War II era through the present. He tells a story of development in four parts - colonialism, developmentalism, globalization, and sustainability - that shows how the global development “project” has taken different forms from one historical period to the next.

Throughout the text, the underlying conceptual framework is that development is a political construct, created by dominant actors (states, multilateral institutions, corporations and economic coalitions) and based on unequal power arrangements. While rooted in ideas about progress and prosperity, development also produces crises that threaten the health and well-being of millions of people, and sparks organized resistance to its goals and policies. Frequent case studies make the intricacies of globalization concrete, meaningful and clear.

Development and Social Change challenges us to see ourselves as global citizens even as we are global consumers.

THE SECULAR RELIGION OF FANDOM

Pop Culture Pilgrim

Jennifer Otter Bickerdike
Buckinghamshire New University

A timely and often provocative examination of a phenomenon that has always been with us, and yet feels suddenly new again. Jennifer Otter Bickerdike asks why we seek solace, spiritual fulfillment, and connectedness in spaces that are not traditionally religious in nature, creating our own sacred spaces as we go. In the process she paves the way for us to reflect on how we confer meaning on the everyday via our new sacred texts, providing an excellent entry into our ongoing conversation about what constitutes religion in an increasingly secular world.

THE CRISIS OF PRESENCE IN CONTEMPORARY CULTURE

Ethics, Privacy and Speech in Mediated Social Life

Vincent Miller
University of Kent

Focusing on the concept of presence, and the challenges that our changing presence poses to our ethics, privacy and public discourse, Miller illustrates how ubiquitous communication technologies have created a disjuncture between how we think we exist in the world and how we actually do exist through our use of devices. He claims the solution is not to focus exclusively on ‘content’ and its regulation as much as it is to examine, understand and resist the alienating aspects of the media itself. He suggests that such resistance involves several ambitious revisions in our ethical, legal and technological regimes.

AN ADVENTURE IN STATISTICS

The Reality Enigma

Andy Field University of Sussex

Will Zach find the missing love of his life and save the world? Statistically speaking, the odds don’t look good...

Once again, bestselling, award-winning author and teacher Andy Field hasn’t just broken the traditional textbook mould with his new novel/textbook, he has forged in the fire of his imagination the only statistics book on the market with a terrifying probability bridge, zombies and talking cats!

His unique approach introduces students across the social sciences to the importance and relevance of statistics in a lavishly illustrated format and style that overcomes traditional anxiety for the subject and dullness of typical offerings.

As with the immensely successful Discovering Statistics Using IBM SPSS Statistics and Discovering Statistics Using R, his motives for writing An Adventure in Statistics stem from his desire to make statistics a bit more pleasant to learn and to counter his negative experience of textbooks when he was a student.

The medium, the message and the rock-solid statistics coverage combine to raise the level of attainment of even the most Maths-phobic student on their first statistics course, covering in more detail, the introductory content his previous books touch on.

In doing so, it provides an unrivalled launchpad to further study, research and inquisitiveness about the real world which equips students with the skills to succeed in their chosen degree and which they can go on to apply in the workplace.

UNDERSTANDING THE SOCIAL WORLD

Research Methods for the 21st Century
Russell K Schutt
University of Massachusetts, Boston

This book focuses squarely on the research requirements of a social world shaped by big data and social media, Instagram and avatars, blogs and tweets; and it confronts the research difficulties created by mobile phones, privacy concerns, linguistic diversity and multicultural neighbourhoods. The book is fast-paced and visually sleek, taking students across disciplinary and national boundaries and transcending past research issues by emphasizing mixed methods, concern for human subjects and application of results. Key features include:
- a full chapter on ethics as well as end-of-chapter sections to apply ethical considerations to the method under study
- ‘Research in the News’ and ‘Careers and Research’ boxes
- an Interactive eBook which will provide online accessibility to the book with links to researcher interviews, journal articles, video clips and self-quizzes.

COVERT RESEARCH

The Art, Politics and Ethics of Undercover Research
David Calvey
Manchester Metropolitan University

There is both a fear and fascination with undercover research in the social sciences. It is an emotive and controversial field which is equated with deception and transgression in an era of increasing ethical regimentation. This book explores the roots of covert research, including the classic exemplars, as well as examining its contemporary dispersed place in the social sciences. Recent developments and links to auto-ethnography, cyber-lurking and investigative journalism are explored.

David Calvey uses a diverse variety of case study materials, including his work on bouncers in the night-time economy. He argues that covert research has a creative and robust tradition and role in the social community rather than a maltreated and submerged one, and that covert research needs to be rehabilitated and appropriately used. Covert research should ultimately become part of the critical imagination and methodological toolkit for social science students.

This is a book about doing research. Not research in general, but a specific kind of research which is as much about the role of the researcher as it is about the focus of the research. The intention is to provide an open and frank account of what it is like to do research: where you, the researcher, are the reason why it will succeed or fail; where you are the main influence on what the research will discover and; how it will be received and evaluated by those who read or use its findings. This book is about research that is based on fieldwork. Fieldwork is about getting out there, wherever ‘there’ is, and becoming part of what is going on. Christopher Pole and Sam Hillyard explore what doing fieldwork entails and what kinds of knowledge and understanding it can lead to. They talk about the excitement of research, the challenges and frustrations, the rewards, the tedium and the sheer hard slog that all research projects involve in different proportions, at one time or another. This is not ‘how to do it’, but more ‘how it has been done and what it’s actually like to do it’. It will be an illuminating read for students undertaking dissertations and research projects across the social sciences.

THE HOW TO OF QUALITATIVE RESEARCH

Janice D Aurini University of Waterloo,
Melanie Heath McMaster University and
Stephanie Howells University of Guelph

Focused on showing researchers how to design a high-quality project and use data collection instruments, this book offers a step-by-step approach to the ‘what’, ‘why’ and ‘how’ of qualitative research.

With clear instructions for developing a research design and complementary research tools, this book is not about describing or theorizing qualitative methods, but how researchers actually create and execute these methods. Helping students conquer the practical issues many novice researchers face, the book provides them with the tools they need to answer critical questions such as:

• what are some ways to sample potential participants?
• how do I construct an interview schedule?
• should I be thinking of a single case study or a comparative study?
• what and how should I record in the field?
• what other sources of data should I consider?

CRITICAL SOCIAL THEORY

Craig Browne University of Sydney

An accomplished, sophisticated and up-to-date account of the state of critical social theory today.

Craig Browne explores the key concepts in critical theory (like critique, ideology, and alienation), and crucially, goes on to relate them to major contemporary developments such as globalization, social conflict and neoliberal capitalism. It shows why there is a need to rethink these categories, while clarifying the basic meaning and purpose that they have held in critical theory.

Critical theory here is not solely the work of Adorno, Horkheimer, Marcuse and Habermas. The book begins with the Frankfurt School but uses this as a base to then explore more contemporary figures such as Nancy Fraser, Axel Honneth, Luc Boltanski, Cornelius Castoriadis, Ulrich Beck, Anthony Giddens, Pierre Bourdieu and Hannah Arendt. At all times, Craig Browne is distinctive in his application and revision of categories derived from their work.

A survey of critical social theory for our times, this is an essential guide for researchers and post-graduate students wishing to grasp a critical understanding of social theory in the modern world.

SOCIOLGY OF EDUCATION

Four-Volume Set

Edited by Jenny Ozga University of Oxford

Education is a major policy preoccupation in both developed countries and emergent economies. At the same time, sociological knowledge about education is becoming more and more varied and dispersed, as new directions develop in response to older assumptions, and (apparently) new and rapidly changing policy problems drive enquiry in different directions. This major work addresses the lack of consolidation of knowledge in the field, drawing on a wide range of specialisms and so allowing researchers to ‘see’ the field clearly, and understand its development over time.
