Welcome...

We’re pleased to welcome you to our 2016 Politics & International Relations catalogue, and to our range of new and bestselling titles.

We remain committed to bringing the key thinkers, debates, and guides to our readers, whether that be in our introductory or higher-level textbooks, handbooks, multi-volume reference works or our journals. 2016 sees the publication of some really exciting new resources, covering topics including non-traditional security studies, sport politics, diplomacy, immigration, electoral behaviour, and international relations and religion.

We do, of course, have a huge range of titles not included in this catalogue, and so make sure you have a look round our website – why not start at our new dedicated Politics & International Relations page, on which we’ll be profiling new books, sharing news and thoughts from our authors and conferences we attend, and highlighting the latest research in our journals. You can also connect with us on Twitter at @SAGECQPolitics.

The SAGE Politics & International Relations Video Collection will also be launching in 2016. The collection, which comprises over 140 hours of video including in-depth interviews from global experts, case studies, ‘In Practice’ videos, and carefully curated licensed film content from sources such as BBC Worldwide, emphasises international representation, the highest levels of academic credibility, real world practice, and strong curriculum fit. It’s a really exciting new resource, helping to elevate the teaching, learning, and research experience. You can find out more here.

THE CHALLENGE OF POLITICS
An Introduction to Political Science
Fifth Edition
Neal Riemer, Douglas W Simon both at Drew University and Joseph Romance Fort Hays State University

This book helps students to see how the subfields of political science converge around a set of crucial questions: can we as citizens and students articulate and defend a view of the good political life and its guiding political values? Can we bring political wisdom to bear on judgments about politics and public issues? Can we develop a science of politics to help us understand significant political phenomena - the empirical realities of politics?

The book equips students with the tools they need to explore the impact of philosophy and ideology, to recognize major forms of government, to evaluate empirical findings, and to understand how policy issues directly affect people’s lives. This Fifth Edition includes updated content on recent international events throughout.

THE POLITICS OF FEAR
What Right-Wing Populist Discourses Mean
Ruth Wodak University of Lancaster

Ruth Wodak traces the trajectories of right-wing political parties from the margins of the political landscape to its centre, to understand and explain how they are transforming from fringe voices to persuasive political actors who set the agenda and frame media debates. Laying bare the normalization of nationalistic, xenophobic, racist and antisemitic rhetoric, she builds a new framework for this ‘politics of fear’ that is entrenching new social divides of nation, gender and body.

CAPITALISM AND BUSINESS
Four-Volume Set
Edited by Leo McCann
Manchester Business School

Debates around the origins, nature, value, effectiveness and sustainability of various ‘models’ of capitalism have become increasingly prominent since the collapse of the state socialist political and economic systems in the early 1990s. While comparative studies of the differing configurations of business and political systems have always been relevant and important, these discussions toward the end of the 20th century marked the arrival of the distinct field of study often labelled the ‘varieties of capitalism’ school of thought. Developments in the field and in the broader macro-economy since that time have been very substantial, and the literature selected for this Major Work provides a much-needed comprehensive overview of these developments, going back to the Cold War era to explore some of the earlier discussions of the divergence and convergence of ‘industrial models’, and progressing back through to the modern day by incorporating critiques and newer developments in ‘varieties of capitalism’ theorizing.

DEMOCRACY IN DECLINE
Rebuilding its Future
Philip Kotler Kellogg School of Management

The world is undergoing unprecedented change with the Internet, globalization, climate change, and the growing concentration of wealth and income which is marginalizing, disenfranchising and disempowering lower and middle income citizens.

However democracy, the key political system for tackling these issues, is under threat. Not enough citizens are politically informed and nearly half of the population doesn’t vote out of apathy or cynicism. The voting system is flawed and governments are gridlocked. Lobbyists hold growing influence over politicians and election candidacy requires substantial funding. Power is ultimately retained by those who already have it.

Philip Kotler confronts this gloomy outlook with some potential solutions and a positive message; that a brighter future awaits if we can come together and save democracy from its decline. Here is an opportunity for all of us to join the conversation, exercise our free speech and get on top of the issues that affect our lives. Let the rebuilding process begin...

THE ENTREPRENEURIAL SELF
Fabricating a New Type of Subject
Ulrich Bröckling

Being an entrepreneur is more than just a profession or even a vocation, nor is it merely a variety of economic activity or the legal status of being self-employed. It is an interpellation to everyone. An entrepreneurial self is something we all are supposed to strive for. In Western societies, the imperative to orientate thinking and behaviour on the objective of market success has become ubiquitous. The call to act as entrepreneurs of our own lives initiates and sustains a never-ending process of constantly shaping the self. One is only ever an entrepreneur à venir, only ever in a state of becoming one, never of being one. As such, a system must produce winners and losers, programmes for self-management and coaching flourish aiming on the optimization of the personality.

The call for entrepreneurship may tap unknown potential but it also leads to permanent over-challenging. It may strengthen self-confidence but it also exacerbates the feeling of powerlessness. It may set free creativity but it also generates unbounded anger. Competition is driven by the promise that the most capable will reap the most success, but no amount of effort can remove the risk of failure. The individual has no choice but to balance out the contradiction between the hope of rising and the fear of decline, between empowerment and despair, euphoria and dejection. Ulrich Bröckling's seminal sociological study analyses these ambivalences and points it to a critical diagnosis of contemporary society.

POLITICAL SCIENCE
A Global Perspective
Leonardo Morlino Scuola di Governo, LUISS, Dirk Berg-Schlosser Philipp University of Marburg and Bertrand Badie

This is a new, advanced-level introduction to political science from the internationally renowned, award-winning team behind the International Encyclopaedia of Political Science.

With breath-taking scope, and moving beyond the mainstream ‘traditional’ approach, the book is a progressive account of the increasing interrelationships and interactions of different levels of politics, from the individual and local, to the national and international, in today’s ‘glocalized’ world.

Key features:
- systematically guides the reader through all key areas of political science: origins, methodological foundations, key topics, and current issues in a series of short, incisive chapters
- takes an international and pluralist perspective with all issues explored in a comparative way related to different cultural and historical contexts
- learning features including boxed descriptions of major concepts, further reading and self-assessment questions at the end of each chapter.

CONCEPTS IN WORLD POLITICS

Edited by Felix Berenskoetter SOAS, University of London

Recognizing the complexity of the study of international relations, and in contrast to most textbooks, this book puts concepts front and centre, systematically unpacking them in a clear, critical and engaging way. Covering eighteen core concepts, from globalization to democracy, sovereignty to peace, it focuses on:

- The multiple meanings of a concept, where these meanings come from, and how they are employed theoretically and practically
- The consequences of using concepts
- The method of concept analysis

Drawn together this book exposes different ways of framing the world, making it an indispensable resource for the study of world politics.

QUESTION TIME WITH FELIX BERENSKOETTER

Why should we pay attention to ‘concepts’ when analyzing world politics?

Concepts play a central role in our attempt to understand the world, whether in everyday language or in academic analyses. They help to order a messy reality and make sense of events and developments; they shape assumptions and guide the explanations we have about world politics. As such, concepts are fundamental to the study of international relations, and we should pay careful attention to them for two related reasons.

First, concepts not only cluster and classify but also constitute social reality. Terms like power, poverty, security or peace are not simply innocent words to describe things, telling us who is powerful, or poor, how to be secure or to build peace. They carry and create particular meanings, which we then often (mis)take for common sense. Second, while we may want concepts to be simple, they are in fact quite complex. Once we take a closer look at them, we discover that power and poverty can be understood and measured in very different ways, and that there are significant disagreements over the meaning of security, or peace. Indeed, any given concept has multiple meanings, which has evolved throughout history, is embedded in different theories and used in various ways by political actors.

Scholars of world politics tend to recognize the constitutive power and the complexity of concepts. And while reflecting on our favourite concepts and the different ways they are used can be unsettling, it is indispensable if we want to avoid intellectual complacency and cognitive closure. It makes us more aware of how open and contested they are, and what happens if a concept is used in one way rather than another. That is, it not only highlights alternative ways of looking at the world, it also shows what concepts do, what function they perform both in everyday life and in ‘high politics’. Thus, paying attention to the multiple forms and performances of concepts can provide valuable insights into the creation and maintenance of socio-political order. Most importantly, it makes us sensitive to the terms we use, and how we use them, which turns us into better students, teachers and scholars.

Why do you feel the study of International Relations is important?

The academic discipline of International Relations (IR) is concerned with ‘world politics’ - which all of us are part of, in some way. And it is very important that we study our world and the forces shaping it, not only to understand them better, but also to give us the ability to intervene. The challenge is that we actually inhabit and move in, and sometimes across, different ‘worlds’; and we experience and observe various kinds of ‘politics’. So the subject matter is very broad! Some IR scholars see this as a problem: to me it just means that IR is a multidisciplinary field of study, which makes it incredibly rich, fascinating and fun.
COMPARING DEMOCRACIES
Elections and Voting in a Changing World
Fourth Edition
Lawrence LeDuc University of Toronto, Richard G Niemi University of Rochester and Pippa Norris Harvard University

The group of contributors [...] is again outstanding. It introduces some of the most important new work on those issues to the broader community of scholars interested in elections and democracy. For all these reasons, Comparing Democracies will remain a must-read for students and lecturers of elections and voting behaviour, comparative politics, parties, and democracy

- Professor Hermann Schmitt, University of Manchester

Providing students with a theoretical and comparative understanding of the major topics related to elections and voting behaviour, this book explores important work taking place on new areas, whilst at the same time covering the key themes that they’ll encounter throughout their studies. This new edition now includes:
• new chapters on authoritarian elections and regime change, and electoral integrity
• a chapter dedicated to voting behaviour
• increased emphasis on issues relating to the economy.

THE SAGE HANDBOOK OF ELECTORAL BEHAVIOUR
Two-Volume Set
Edited by Kai Arzheimer University of Mainz, Jocelyn Evans University of Leeds and Michael S Lewis-Beck University of Iowa

The study of voting behaviour remains a vibrant sub-discipline of political science. The SAGE Handbook of Electoral Behaviour is an authoritative and wide ranging survey of this dynamic field, drawing together a team of the world’s leading scholars to provide a state of the art review that sets the agenda for future study.

Taking an interdisciplinary approach and focusing on a range of countries, the Handbook is composed of eight parts. The first five cover the principal theoretical paradigms, establishing the state-of-the-art in their conceptualization and application, and followed by chapters on their specific challenges and innovative applications in contemporary voting studies. The remaining three parts explore elements of the voting process to understand their different effects on vote outcomes.

The SAGE Handbook of Electoral Behaviour is an essential benchmark publication for advanced students, researchers and practitioners in the fields of politics, sociology, psychology, geography and research methods.

HISTORIC DOCUMENTS OF 2015
Edited by Heather L Kerrigan

CQ Press has published the Historic Documents series annually since 1972. Each edition pairs original, comprehensive narratives with important documents chosen by SAGE and the volume editor to chronicle the major events of the year. Organized chronologically, each volume covers the same wide range of topics: business, the economy and labour; energy, environment, science, technology, and transportation; government and politics; health and social services; international affairs; national security and terrorism; and rights and justice.

The 2015 volume begins with an insightful essay that sets the year’s events in context, and each document or group of documents is preceded by a comprehensive introduction that provides background information on the event. Full-source citations are provided.

With the end of the Cold War, threats to national security have become increasingly non-military in nature. Issues such as climate change, resource scarcity, infectious diseases, natural disasters, irregular migration, drug trafficking, information security and transnational crime have come to the forefront. This book provides a comprehensive introduction to Non-Traditional Security concepts. It does so by:

- covering contemporary security issues in depth
- bringing together chapters written by experts in each area
- guiding readers towards additional material for their essays and exams through further reading lists
- giving detailed explanations of key concepts
- testing understanding through end-of-chapter questions.

THE SAGE ENCYCLOPEDIA OF WAR: SOCIAL SCIENCE PERSPECTIVES
Edited by Paul Joseph Tufts University

Traditional explorations of war look through the lens of history and military science, focusing on big events, big battles, and big generals. By contrast, The SAGE Encyclopedia of War: Social Science Perspectives views war through the lens of the social sciences, looking at the causes, processes and effects of war and drawing from a vast group of fields such as communication and mass media, economics, political science and law, psychology and sociology.

Key features include:
- approximately 700 entries organized in an A-to-Z format, authored and signed by key academics in the field
- entries conclude with cross-references and suggested further readings, aiding researchers further in their research journeys
- an alternative Reader’s Guide table of contents groups articles by disciplinary areas and by broad themes
- a Glossary and helpful Resource Guide directing researchers to classic books, journals and electronic resources for more in-depth study.

This important and distinctive work will be a key reference for all researchers in the fields of political science, international relations and sociology.

THE SAGE ENCYCLOPEDIA OF SURVEILLANCE, SECURITY, AND PRIVACY

Edited by Bruce A Arrigo University of North Carolina, Charlotte

Although surveillance hit the headlines with revelations by Edward Snowden that the NSA had been tracking phone calls worldwide, surveillance of citizens by their governments actually has been conducted for centuries. Only now, with the advent of modern technologies, it has exponentially evolved so that today you can barely step out your door without being watched or recorded in some way. In all levels of social structure, from the personal to the political to the economic to the judicial, The SAGE Encyclopedia of Surveillance, Security and Privacy uncovers and explains how surveillance has come to be an integral part of how our contemporary society operates worldwide and how it impacts our security and privacy.

Key features include:
- approximately 600 signed articles, authored by prominent scholars from around the globe
- further reading suggestions and cross-references that conclude each article guide students further as they explore a topic
- a Reader’s Guide organizes entries into broad thematic areas.

CRITICAL THINKING FOR STRATEGIC INTELLIGENCE

Second Edition

Katherine Hibbs Pherson and Randolph H Pherson

This indispensable text is framed around 20 key questions that all analysts must ask themselves as they prepare to conduct research, generate hypotheses, evaluate sources of information, draft papers, and ultimately present analysis, including: how do I get started? What is my argument? And, how do I convey my message effectively?

TERRORISM AND POLITICAL VIOLENCE
Edited by Caroline Kennedy-Pipe
University of Hull, Gordon Clubb
Leeds University and Simon Mabon
Lancaster University

An illuminating overview of the challenges of teaching and learning about terrorism and political violence. It engages with the causes, dynamics and context of violence and brings theoretical depth to the topic in multiple perspectives

- Emmanuel-Pierre Guittet,
University of Manchester

Taking an interdisciplinary approach to provide a unique intellectual rigour when introducing readers to cutting-edge research, this book brings together chapters contributed by members of the Terrorism and Political Violence Association network. The book explores contemporary issues, such as drone warfare, state violence, children and political violence, cyber-terrorism and de-radicalisation.

Understanding the Value of Social Science in Today’s World

BIG IDEAS IN SOCIAL SCIENCE
David Edmonds BBC World and Nigel Warburton The Open University

Are human beings less violent than before? Why do we adopt certain moral and political judgements? Why is the gap between rich and poor getting bigger? How do we decide which criminal policies are effective? What is the Population Challenge for the 21st Century? What is social science?

In Big Ideas in Social Science, David Edmonds and Nigel Warburton put these and more of our society’s burning questions to 18 of the world’s leading social scientists including Steven Pinker, Ann Oakley, Lawrence Sherman, Kate Pickett, Robert J. Shiller and Doreen Massey.

The interviews for this book are based on the Social Science Bites series of podcasts, which can be freely accessed at www.socialsciencespace.com, and subscribed to via iTunes. Social Science Bites was inspired by the popular Philosophy Bites podcast (www.philosophybites.com), which was founded by David and Nigel in 2007 and has so far had 26 million downloads.

EXAGGERATED CLAIMS?
The ESRC, 50 Years On
David Walker

What is the role of the state in distributing research money? How do ‘arm’s-length’ funding agencies relate to public policy and business? This original study looks at the main social science funding agency in the UK, which was established 50 years ago. It examines how funding decisions are related to power. Walker asks the tricky question, why has social science research not achieved a more salient role in state policy formation and management strategy: is the funding agency responsible?

Insightful, engrossing and highly original, the book will be required reading for anyone who has written or will write a social science research bid and, more widely, for students of power, knowledge and culture.

FOREIGN POLICY OF THE EUROPEAN UNION
Four-Volume Set

Edited by Ben Tonra University College Dublin, Richard Whitman University of Kent and Alasdair Young Georgia Institute of Technology

The European Union’s significance as an international actor rests on several foundations. Empirically, the Union’s size, scope and scale gives it a presence in the world in terms of politics, diplomacy, economics, trade and aid that is in need of analysis and contextualization. In theoretical terms, the Union is a fascinating experiment in democratic, multistate, multinational policy-building, the likes of which we have not seen before. The editors present foundational articles that have shaped mainstream academic discourse surrounding this topic along with more provocative pieces, which will cumulatively provide a sophisticated and nuanced understanding of this fascinating international actor.

POLICY MAKING IN BRITAIN
An Introduction
Second Edition

Peter Dorey University of Cardiff

An important analysis of the systems of British politics and the pressures it faces. This book sets a clear course for the reader, and presents a range of political debates in a logical, concise, and highly readable manner

- Dr Andrew Crines, University of Leeds

Introducing students to the public policy making process in Britain today, this book adopts an empirical approach to the study of policy making by relating theory to actual developments in Britain since the 1980s. It covers:
- ideas, problem definition, issues and agenda-setting
- key individuals and institutions
- parliament and public policy implementation
- the shift from Government to governance (including marketization, and devolution)
- the increasing role of the private and voluntary sectors in policy delivery
- internationalisation and Europeanisation of policies and policy making
- evaluation, audits and the new public management.

The refugee crisis arising primarily from conflicts in the Middle East and North Africa is not the first time that migration and refugee flows have been at the top of Europe’s political agenda. The difference this time is that it seems a pivotal moment both in the history of migration to Europe as well as the history of the EU itself. Not only does it raise questions about rights, protection, borders and security, but also about the EU’s capacity to respond. These issues became conjoined in the chaos of hundreds of thousands of men, women and children - many of them from Syria - improvising their way by any means of transport available, including by foot, across the borders of south east Europe, often towards Germany. More than 3500 people died making perilous crossing of the Mediterranean in the first 11 months of 2015. EU governments squabbled about the appropriate response and eventually asetttled on a combination of measures involving relocating up to 160,000 asylum seekers while also trying to ensure a more orderly reception for those getting to Europe and measures that try to step up controls on those crossing the Mediterranean. The effectiveness of these measures has a powerful capacity to reflect back on the EU as an organisation. How it responds - and how effective this response is seen by its citizens - will play a key role in shaping the EU’s future.

Why do you feel the study of International Migration is important?

While not always central to the study of international relations, there is a strong case to be made that the study of international migration should be much more central. There are at least three good reasons for this. First, international migration is, by definition, an issue that cuts across domestic and foreign politics, involves relations between sending and destination countries as well as the effects of creation of diasporas and transnational communities linked to migration. Second, there are powerful linkages between migration and a whole host of other issues that are central to the study of international relations. To name just a few: security, rights, borders, development, gender, trade and protection. Third, while there is not a comprehensive international regime for migration - and one is unlike to develop - there are a host of bilateral and multilateral frameworks that are often issue-specific or regionally focused across the globe that demonstrate the varying forms that migration governance beyond the state can take.

QUALITATIVE RESEARCH IN POLITICAL SCIENCE
Four-Volume Set
Edited by Joachim K. Blatter (University of Lucerne), Markus Haverland (Erasmus University Rotterdam) and Merlijn van Hulst (Tilburg University)

This Major Work presents a comprehensively curated collection of key literature, organized into four thematic volumes:

- **Volume One** includes papers on the ontological and epistemological foundations of qualitative research, before moving onto articles that compare qualitative with quantitative research, as well as statements that contrast the divergent strands within qualitative research.
- **Volume Two** includes literature that exemplifies the tradition and techniques of cross-case comparisons.
- **Volume Three** is devoted to the spectrum of approaches that focuses on within-case analysis in order to provide evidence for causal claims. The selected works shed light on the corresponding major concepts: causal mechanisms, congruence and process tracing.
- **Volume Four** captures the spectrum of qualitative methods that highlights the importance of context and social constructions (meanings) and is most often summed up as interpretivism: ethnographic and practice approaches as well as discourse, frame and narrative analysis.

UNDERSTANDING GLOBAL DEVELOPMENT: REFLECTIONS ON FIELDWORK EXPERIENCES
Fieldwork Issues, Experiences and Reflections
Edited by Gordon Crawford, Lena Kruckenberg, Nicholas Loubere all at University of Leeds and Rosemary Morgan University of Edinburgh

This book provides engaging perspectives on the varied role of a researcher in the field. Both intergenerational and international in scope, the theories and concepts presented contextualize key aspects of developmental fieldwork and introduce the often hidden practicalities of actually being in the field.

After setting the stage with basic information, common challenges and potential mistakes surrounding a specific aspect of the researcher’s role, each chapter focuses on the practical applications and real-world examples of these elements of field research. Transcribed interviews with established authorities and personal field notes written by emerging researchers then showcase not only concrete examples of what happens during fieldwork, but also offer focused and relevant advice that gives genuine insight into what to expect and how to solve common dilemmas, like researching elites or working with vulnerable groups.

Developed in partnership with leading academics and practitioners, the SAGE Video Collection in Politics and International Relations features over 140 hours of curated video content, of which nearly 75% is exclusive to SAGE.

The collection includes:

- interviews with experts on subjects including international migration, political philosophy and the international relations of China
- tutorials on a wide range of key topics, such as the American Presidency and policy analysis
- case study videos on real world examples, such as the NATO Intervention in Kosovo and Islamic State
- seminal documentaries from BBC Worldwide and footage of renowned political speakers including Martin Luther King and John F. Kennedy.

SAGE Video is available to libraries for subscription or purchase.

Thoughtful and reflective material by scholars that can be used in classrooms around the world.

– Myria Georgiou, London School of Economics
