Inspection Copies
SAGE’s inspection copy service allows lecturers to thoroughly review our textbooks before deciding whether to adopt them for use on courses. Request and manage your copies quickly and easily at sagepub.co.uk/inspectioncopy

Extra Teaching & Study Tools
Many of our textbooks are supported by online resources to assist lecturers with planning and delivering engaging seminars and lectures, and to help students to explore topics further and check their progress.

Wherever you see the companion website or SAGE edge icons, you can access further resources.

SAGE eBooks
The majority of our books are now available as eBooks. Visit sagepub.co.uk/ebooks for more information.

Much more on Psychology online
Visit our new discipline page where we’ll be sharing free hints, tips, and resources from our authors and editors, providing news on and free content from our books, and highlighting the latest research from our journals.

sagepub.co.uk/psychology
Welcome to the SAGE 2019 Psychology catalogue.

SAGE’s Psychology list is diverse; our authors and editors are from widespread international markets and representative of multiple research perspectives. The critical orientation of our textbook publishing supports students from their first module through to and including postgraduate study. In this catalogue you’ll find our latest and forthcoming books, and a few bestsellers, but for a full list of titles please visit www.sagepub.co.uk

Many of our textbooks come with online resources, and all have been designed with engaging pedagogy, to save you valuable teaching time and to support students whether they are struggling with the essentials, need to develop their critical thinking skills, or are looking to go deeper into the topic.

Can’t find the right book for your course? If no single textbook works, we can turn a few books into a discounted bundle, making sure your students get the best deal. And if you’d like an even broader range of content from across our textbook, reference and journal publishing, we can create a tailor-made textbook just for your course.

We continue to seek out the best in rigorous research and creative pedagogy, so if you are interested in writing or editing a project with us or want to share your teaching experience, we’d love to hear from you.

@SAGEpsychology

Key new titles
The challenge of teaching bio-psychology is first getting students up to speed with the basic brain functions and terminology, then applying this to psychology and finally developing critical thinking about the subject. This book uniquely addresses all three of these issues and provides a resource that supports students at each of these different levels of understanding.

Key features include:

- New video animations for the biology chapters and many high-quality illustrations throughout, helping students grasp the basic neuroanatomy and microbiology.
- ‘Check your understanding’ questions in the book and MCQs online help students test their understanding and prepare for assessments.
- Chapters cover the need-to-know topics for psychology students with ‘Insight’ and ‘Focus on Methods’ boxes, highlighting these topics’ relevance to real-world research and applications.
- Spotlights build on the chapters, delving deeper into contemporary debates, issues and controversies around topical areas such as post-traumatic stress disorder, obesity and pain.

CONTENTS

Clinical Psychology: Revisiting the Classic Studies traces 14 ground-breaking studies by researchers such as Leo Kanner, David T. Lykken and Aaron T. Beck to re-examine and reflect on their findings, and engage in a lively discussion of the subsequent work that they have inspired.

Contents

Addiction
A biopsychosocial perspective
Chris Chandler and Anita Andrews, both at London Metropolitan University

Providing students with an evidence-based approach to the psychological, biological and societal aspects of addiction, this text covers a broad range of topics, critical perspectives and influential theories.

Chris Chandler and Anita Andrews:
- Address the neuroscience and psychology of addiction
- Provide a critical account of the science and research in addiction
- Include chapter overviews and summaries, learning aims and case studies to help students in their study.

Contents
Addiction Defined / Psychopharmacology Of Addictive Substances / Biological Theories Of Addiction / Genetics Of Addiction / Psychological Theories Of Addiction / Pharmacotherapy For Addiction / Psychological Treatments / Non Substance Addictions: Gambling / Society, Policy, Law And Ethics

Child Development
Concepts and Theories
Jean A. Mercer Stockton University

Given the complex nature of child development, this topic can be a real challenge for some students. This book takes a step back to focus just on the key concepts of child development that all students must learn to give them a firm foundation of the theories and their applications.

An Introduction to Child Development
Third Edition
Thomas Keenan Niagara College, Subhadra Evans Deakin University and Kevin Crowley University of South Wales

"This book stands out from other textbooks with its relevant and contemporary viewpoints on human development across the life span, covering theories of child development, including biological viewpoints, as well as methodological issues in child development research."

Child Development for Early Years Students and Practitioners
Fourth Edition
Sally Neaum Teesside University

This guide is for students of degrees and foundation degrees in Early Years, Early Childhood Studies and related disciplines, and early years practitioners. It considers the biological/social debate, explores holistic development, examines factors affecting development and includes a chapter on reflective practice. This third edition has also been updated throughout and brought into line with current policy.
CHILD DEVELOPMENT FROM INFANCY TO ADOLESCENCE
An Active Learning Approach
International Student Edition
Laura E. Levine Central Connecticut State University and Joyce Munsch California State University
Chronologically organized, this book presents topics within the field of child development through unique and highly engaging active-learning opportunities.

March 2019 • 744 pages
Paper (9781446295663) • £89.00

AUTISM SPECTRUM DISORDER
Characteristics, Causes and Practical Issues
Second Edition
Jill M. Boucher City University, London
Following the popular and provocative first edition, the second edition provides the latest research on autistic spectrum disorders, from exploring theories at the psychological, neurobiological and ‘first cause’ levels to methods of assessment, intervention, education and support.

2017 • 368 pages
Cloth (9781446295670) • £95.00
Paper (9781446295670) • £34.99

UNDERSTANDING INTELLECTUAL AND DEVELOPMENTAL DISABILITIES
Grace Iarocci Simon Fraser University, Jacob A. A. Burack McGill University, Montréal, Dermot Bowler City University, London and Leonard Abbeduto University of California Davis
This text provides a current and accessible research-based introductory text on developmental disabilities, written from a developmental perspective. Developmental disability is an essential area of study for both students and those interested in promoting the development of children with developmental disabilities. This text helps readers to develop an understanding of the reciprocal relation between typical and atypical development based in the developmental psychopathology perspective.
The book covers exciting debates about the role of genes and environments in typical and atypical development, the role of peer and parent-child relationships in shaping development, social attitudes and policies with regard to diversity and ethical issues surrounding genetic screening and behavioural intervention. Intuitively engaging for students, this text serves as an introduction into the world of research and scholarship in this area.

CONTENTS
Part I: Foundations / Theory & Methods in Developmental Disabilities / Gene-Environment Interactions And Developmental Disability / Diagnosis, Assessment And Intervention / Part II: Intellectual Disabilities / Down Syndrome (Ds) / Fragile X Syndrome / Fetal Alcohol Spectrum Disorder (Fasd) And Other Environmental Disorders / Rare Disorders That Cause Intellectual Disability / Part III: Developmental Disabilities / Autism Spectrum Disorder: Theories, Methods And Research / Autism Spectrum Disorder: Diagnosis And Assessment / Language Disabilities / Learning Disabilities / Attention Deficit (Hyperactivity) Disorder / Part IV: Developmental Disability In Context / Parents, Family And Community / Legal, Societal And Policy

CRIMINOLOGICAL AND FORENSIC PSYCHOLOGY
Second Edition
Helen Gavin University of Huddersfield

The second edition of Criminological and Forensic Psychology continues to be a theoretically rigorous and practically-relevant introduction to this fascinating field. It covers both the conceptual basis within which psychology knowledge is applied in forensic contexts, and the practical applications of psychology to the criminal civil justice systems.

Key features include:
• Case studies, which include the James Bulger investigation, are woven into every chapter to bring the topic to life, and encourage the application of knowledge by placing students in the full context of a criminal case
• In-depth exploration of the fascinating courtroom process including separate chapters on The Defendant’s Mind and The Jury
• A dedicated chapter on research methods specific to forensic psychology to help students with their research projects
• Online resources including chapter-by-chapter multiple choice questions, additional case studies and links to further readings.

CONTENTS
Section 1: Defining Criminological And Forensic Psychology / Defining Forensic Psychology / Research Methods In Forensic Psychology / Section 2: Psychological Explanations Of Crime / Psychological Approaches To Understanding Crime / Who Commits Crime? The Criminal Mind / Juvenile Criminals / Section 3: Psychological Explanations Of Specific Crime Types / The Psychology Of Homicide / The Psychology Of Terrorism / Crimes Of A Sexual Nature / Intimate Relationship Aggression: Domestic Violence And Domestic Homicide / The Psychology Of Firesetting / The Psychology Of Theft, Robbery, And Burglary / The Psychology Of Economic Crime / Section 4: Psychology In Detection And Investigation / Psychology In The Investigation Of Crime / Psychology In The Police Station 1: Victims And Witnesses / Psychology In The Police Station 2: Investigative Interviews And The Psychology Of False Confession / Section 5: Psychology In The Court Room / Psychology In Court 1: Procedures And Evidence / Psychology In Court 2: The Defendant’s Mind / Psychology In Court 3: The Mind Of The Jury / Section 6: Psychology In Prison / Punishment, Rehabilitation, And Psychology / Adjustment To Prison Life: Mental Disorder, Life Imprisonment, And Death Row

POSITIVE PSYCHOLOGY

The Science of Well-Being

John Zelenski
Carleton University, Ottawa

Positive Psychology brings together a range of research and a comprehensive review of the more recent work and lessons learned since the founder’s original vision of this field. Organised into five sections: An Introduction, Positive Experiences, Personality Processes, External Influences, and Applications, this text provides a thorough introduction to an interesting and challenging area in Psychology. With a final look at the future of Positive Psychology, and its potential to inform social change and how useful this knowledge can be when considering the well-being of entire societies, this text is an enlightening read and invaluable resources for students.

ESSENTIAL PSYCHOLOGY

Third Edition

Edited by Philip Banyard Nottingham Trent University

The third edition of Essential Psychology provides a thorough introduction for students and anyone who wishes to gain a strong overview of the field. This team of authors provide a student-friendly guide to Psychology, with a vivid narrative writing style, features designed to stimulate critical thinking and inspire students to learn independently, and online resources for lecturers and students.

The third edition:
- Gives students a firm foundation in all areas covered on accredited British Psychological Society degree courses
- Includes new chapters on psychopathology, research methods, language, motivation and emotion, lifespan development, health psychology, forensic psychology and critical social psychology
- Relates theory to the real world to help students think about where they will employ their degree after undergraduate study.

PERSONALITY AND INDIVIDUAL DIFFERENCES
Revisiting the Classic Studies
Edited by Philip Corr

Personality and Individual Differences: Revisiting the Classic Studies traces 14 ground-breaking studies to re-examine and reflect on their findings, and engage in a lively discussion of the subsequent work that they have inspired. The book introduces readers to the studies in psychology that changed the way we think about core topics in the discipline today. It provokes students to ask more interesting and challenging questions about the field by encouraging a deeper level of engagement, both with the details of the studies themselves and with the nature of their contribution.

Edited by leading scholars in their field and written by researchers at the cutting edge of these developments, the chapters in each text provide details of the original works and their theoretical and empirical impact, and then discuss the ways in which thinking and research has advanced in the years since the studies were conducted.

Research Methods

RESEARCH METHODS FOR COGNITIVE NEUROSCIENCE
Aaron Newman Dalhousie University

Given the breadth of neuroimaging techniques available today, this text is novel in covering all of the different techniques used in cognitive neuroscience. Aaron Newman has curated an approachable text for students, researchers, and writers. This text has the detail for those who wish to understand the basics of neuroimaging and also for those who wish to further understand particular techniques. With a conversational, student-friendly writing style, Aaron Newman introduces the key principles of neuroimaging techniques, the relevant theory and the recent changes in the field.

Key features include:
- Introduces different techniques focusing on neurophysiological processes and how these are related to cognition
- Offers students the ‘nuts and bolts’ of how the technology works with detailed descriptions of the techniques
- Provides detailed descriptions of the techniques and discusses their application in research.

PROGRAMMING EXPERIMENTS IN PYTHON
Jonathan Peirce University of Nottingham (also i-Reviews Editor), Jeremy R. Gray and Michael MacAskill

Python is a free, open-source, cross-platform programming language that allows a great deal to be accomplished in very few lines of code. Aimed at advanced undergraduate students, postgraduate students and professional scientists, this textbook provides a comprehensive guide to enable readers to write experiments in Python and PsychoPy.

Together with Building Experiments in PsychoPy, this text is designed to support those who are familiar with PsychoPy and who want to progress into programming in the original software package Python. It will enable readers to program directly in Python and will support them when using hardware in experiments, for example eye trackers, EEG or fMRI.

RESEARCH METHODS AND STATISTICS IN PSYCHOLOGY
Third Edition
S Alexander Haslam The University of Queensland and Craig McGarty Western Sydney University

A highly readable and comprehensive introduction to conducting research in psychology, this book guides readers through the range of choices involved in design, analysis, and presentation and is supplemented by a range of practical learning features both inside the book and online.

This third edition offers:
- Updated ‘Research Bites’ in every chapter: a space to step back from the text and reflect on the ways in which it relates both to issues in the world at large and to contemporary debates in psychology
- Updated coverage of experimental design, survey research and ethics
- More expansive coverage of qualitative methods
- For lecturers: videos for each chapter, and a course cartridge with testbanks, PowerPoints, and other resources for easy upload to your LMS.
- For students: website with MCQs, flashcards, SPSS data files, stats tests and example research report.

STATISTICS FOR PSYCHOLOGY: A GUIDE FOR BEGINNERS
(and everyone else)
Roger Watt and Elizabeth Collins, both at University of Stirling

This concise, easy-to-understand and highly visual book helps students to understand the principles behind the many statistical practices. This text helps students to build a mental map to enable them to work their way through tests and procedures with a better level of understanding (and ultimately feel more confident and get better grades). Statistical analysis will also be covered in the book in the same simple-to-follow way, without messy details or complicated formulae.

CONTENTS
Why Do We Need Statistics? / The Research Cycle / Variables / Relationships Between Variables / Uncertainty In Research / Null Hypothesis Testing / Statistical Tests For 1 Independent Variable / Minimising Uncertainty: Research Design / Measurements And Uncertainty / Sampling And Uncertainty / Hypotheses With More Than 1 Independent Variable / Covariations: Relationships Between 2 Independent Variables

QUALITATIVE PSYCHOLOGY

A Practical Guide to Research Methods

Third Edition
Edited by Jonathan A. Smith Birkbeck College

‘No other qualitative methods text achieves this balance between theory and application while managing to maintain an impartial perspective on contrasting approaches. This is, above all, a useful book. It should be on every researcher’s shelf!’

– Professor Patrick J Leman, University of London

ETHICS IN
PSYCHOLOGICAL
RESEARCH

A Practical Guide for the Student Scientist
Daniel P. Corts Augustana College and Holly E. Tatum Randolph College

A practical guide to help students, researchers and their mentors identify, prevent, mitigate and resolve ethical issues in research. Using a unique ethical framework, the authors navigate through issues of institutional policies and academic freedom, including real-life examples of ethical questions to show how to address similar problems should they arise in the researcher’s own work.

October 2018 • 120 pages
Paper (9781506350004) • £30.99

LAB MANUAL FOR
PSYCHOLOGICAL
RESEARCH

Fourth Edition
Dawn M. McBride and J. Cooper Cutting, both at Illinois State University

Packed full of useful exercises, checklists, and how-to sections, this robust lab manual gives students hands-on guidance and practice conducting their own psychological research projects.

March 2019 • 168 pages
Paper (9781544323565) • £31.99

60 SECONDS WITH...A SUSSEX STUDENT

Which part of your course have you found most rewarding? What about most challenging?

The modules that are most rewarding are the ones I get stuck into, master and ace the exam. It doesn’t really matter what type of content it is, they’re all interesting once I’m good at them.

The most challenging part is working through procrastination.

How have you developed as a student and as a person since you were a fresher?

I have become more confident, independent and happy.

What was your favourite project or assignment and how did you go about completing it?

My favourite projects were the experiments we designed and collected data for, because I experienced every part of the scientific process.

Where do you see your Psychology degree taking you, or will you go in a new direction after University?

I’m embarrassed to say that I still don’t really know. I’m considering doing a Masters in something related to Self Regulation because that has been my favourite module in my course.
