Sara Miller McCune founded SAGE Publishing in 1965 to support the dissemination of usable knowledge and educate a global community. SAGE publishes more than 1000 journals and over 800 new books each year, spanning a wide range of subject areas. Our growing selection of library products includes archives, data, case studies and video. SAGE remains majority owned by our founder and after her lifetime will become owned by a charitable trust that secures the company's continued independence.
Environmental Politics and Policy

Twelfth Edition

Walter A. Rosenbaum

University of Florida
BRIEF CONTENTS

Figures, Tables, Boxes, and Maps xvi
Preface xix
About the Author xxi
Chapter 1 After Earth Day 1
Chapter 2 Making Policy 25
Chapter 3 Making Policy 57
Chapter 4 Common Policy Challenges 95
Chapter 5 More Choice 121
Chapter 6 Command and Control in Action 145
Chapter 7 A Regulatory Thicket 177
Chapter 8 Energy 199
Chapter 9 635 Million Acres of Politics 233
Chapter 10 The Politics and Policy of Global Climate Change 259
List of Abbreviations 279
Notes 283
Index 321
Figures, Tables, Boxes, and Maps xvii
Preface xix
About the Author xxii

Chapter 1 After Earth Day 1
“Frack, Baby, Frack” 2
A Spreading Technology 2
Contested Environmental Impacts 2
Neighbor Against Neighbor 3
Governments in Conflict 4
A Continuing Controversy 5
America’s Environmental Legacy 5
The Evolution of U.S. Environmentalism 7
The Environmental Decade: From Richard Nixon to Ronald Reagan 7
Policy Deadlock: From Ronald Reagan to George H. W. Bush 8
Environmental Leadership Revived: From George W. Bush to Barack Obama 9
A Collision of Expectations: The Obama Presidency 10
A Radical Redirection: The Trump Administration Environmental Agenda 11
Ongoing Challenges: Present and Future 13
Keeping Environmentalism Contemporary 14
Modernizing Environmental Laws 14
Implementing Policy 15
Controlling Costs 16
Responding to Evolving Science 17
The Challenge of Sustainability 18
Sustainability and Federal Policy 19
State and Local Government Initiatives 20
Sustainability’s Many Meanings 20
Plan for the Book 21
Conclusion 23

Chapter 2 Making Policy 25
The Process 25
Protecting the Bee: The Pathways of Policy 25

PREFACE

We are living in an extraordinary period—perhaps the most extraordinary period in the history of American environmental governance since the first Earth Day, 1970. The years between 2016 and 2020—from the presidential election of Donald Trump to the election of his successor, Joseph Biden—produced the most sudden, radical transformation and discontinuity in environmental policy ever experienced in modern environmental history. These transformations and their consequences are recognized in every chapter of this book. Still, readers familiar with earlier editions of Environmental Politics and Policy will recognize a continuity with previous editions in conceptual framework and substantive policy concerns.

The foundational chapters that explain and illustrate the essential components of the policymaking process (Chapters 1, 2, and 3) still cover these key areas, but they have been carefully reorganized for greater clarity and continuity. Chapter 1 still provides a brief history of important environmental presidencies and some continuing challenges confronting the environmental movement. Chapter 2 now focuses entirely on the policymaking process, while Chapter covers the institutions and politics of policymaking. Throughout the book, case studies and other examples of key concepts have been updated comprehensively to assure timeliness and relevance. Each chapter has been edited rigorously to eliminate material no longer relevant. The result is a more concise and very contemporary narrative that still does not sacrifice fundamentals, such as the conceptual design, the careful explanation of substantive policy, and the abundant case studies and other illustrations that have appealed to readers of previous editions. As always, a major subtext is the continuing challenge, inherent in environmental policymaking, of reconciling sound science with practical politics.
ABOUT THE AUTHOR

Walter A. Rosenbaum is professor emeritus of political science at the University of Florida and director emeritus of the University of Florida’s Bob Graham Center for Public Service. His recent activities include an analysis of the EPA’s capacity for climate change regulation, prepared for the Brookings Institution; an examination of the data requirements for a new Federal Environmental Legacy Act; preparation of an energy policy text for CQ Press; and an analysis of U.S. energy governance for MIT Press. He has also served as a staff member of the U.S. Environmental Protection Agency and an adjunct professor in the School of Public Health, Tulane University Medical College. In addition to his teaching and research, he has been a consultant to the EPA, the U.S. Department of Energy, the Federal Emergency Management Agency, and the South Florida Ecosystem (Everglades) Restoration Project. He is currently the editor-in-chief of the Journal for Environmental Studies and Sciences.
