

Detailed Contents

Preface	xv
Acknowledgments	xvii
About the Author	xix

PART I: INTRODUCTION AND BACKGROUND

1. Introduction to an Evolutionary Perspective	3
The Beginnings of an Evolutionary Neuroscience of Behavior and Experience	4
Pathways Toward an Evolutionary Psychology	6
Ethology	7
Genetic Traditions	15
Integration of Genetics and Evolution	16
Kin Selection and Altruism	17
Sociobiology	20
Bringing Evolution to Psychology	22
Adaptation	29
Summary	32
Study Resources	33
Review Questions	33
For Further Reading	34
Key Terms and Concepts	34
SAGE Study Site	35
Glossary Terms	35
2. What Is Evolution?	37
How and Why Questions	39
Understanding Behavior From an Evolutionary Perspective	40
Science as a Way of Knowing	41
The Evolutionary Approach	44
Charles Darwin	47
Evolution After Darwin	52
Evolution Is Still Taking Place	53
Sexual Selection	55
Psychological Processes	56
In the Tradition of Darwin	58
Research Across Species and Comparative Psychology	59
Understanding Individual Differences and Development	60

Understanding Psychopathology	61
The Value of Understanding Function	63
Ignoring Evolutionary Thinking	66
John Watson	66
B. F. Skinner	67
Return to Evolutionary Thinking	68
Summary	69
Study Resources	70
Review Questions	70
For Further Reading	70
Key Terms and Concepts	71
SAGE Study Site	71
Glossary Terms	72
3. Genetic Perspectives	73
Evolution and Genetics	73
What Genes Do	74
Functions of Genes	77
Genes and Their Expression	78
DNA	79
Overview of DNA and RNA	80
Structure of DNA	80
Structure of RNA	81
Metaphors of DNA	83
From Proteins to Structure and Behavior	85
Genetics and Evolution	86
Mapping the Genome	86
Cell Division	88
Variation in Duplication	89
Sexual Reproduction	90
Variations in Genes	91
Mendel and Inheritance Patterns	92
Mendel's Experiments	93
Overview	96
Sex-Linked Inheritance	96
Codominant Alleles and Human Blood Typing	98
Genetic Influences	100
Incomplete Dominance	102
Pleiotropy and Sickle Cell Anemia	102
Epigenetic Processes	103
Mitochondrial Inheritance	104
Behavioral Genetics	108
Summary	110
Study Resources	111
Review Questions	111
For Further Reading	112
Key Terms and Concepts	112
SAGE Study Site	113
Glossary Terms	113

PART II: BASIC HUMAN FUNCTION AND PROCESS

4. Evolution of Brain and Function	117
The Brain in Evolution	119
The Brain Structure of Mammals	120
Hughlings Jackson	125
Triune Brain	126
The Brain's Default Network: Internal and External Processes	132
Higher Cognitive Processes	135
Development of the Nervous System	135
Evolution of Brain Size	139
Other Factors Related to the Brain	140
Evolution of Sensory Systems	149
Hominin Evolution	151
Summary	156
Study Resources	156
Review Questions	156
For Further Reading	157
Key Terms and Concepts	157
SAGE Study Site	157
Glossary Terms	158
5. Developmental Aspects	159
Mother-Child Interactions	163
Research Concerning Attachment	164
Genetic Aspects of Attachment	169
Differential Susceptibility to Rearing Influences	169
Life History Theory	170
Developmental Psychology From an Evolutionary Perspective	171
Tenets of Evolutionary Developmental Psychology	173
Developmental Theories	174
Sensory Development	175
Memory and Cognition	175
Children and Animals	176
Play	177
Development of Aggression	178
Theory of Mind	178
Personality	180
Judgment of Personality	184
Summary	185
Study Resources	185
Review Questions	185
For Further Reading	186
Key Terms and Concepts	186
SAGE Study Site	187
Glossary Terms	187
6. Emotionality	189
Darwin and the Expression of Emotions	190
The Nature of Basic Emotions	200

Underlying Dimensions of Emotionality	202
Understanding Categorical and Dimensional Models of Emotion	203
Emotional Expression and Recognition	206
Cortical Nature of Emotion	206
Emotional Development	209
Emotional Development of Facial Expression	210
Vocal Expressions of Emotion	211
Music	212
Summary	213
Study Resources	214
Review Questions	214
For Further Reading	214
Key Terms and Concepts	214
SAGE Study Site	215
Glossary Terms	215
7. Language	217
The Nature of Language	218
The Evolution of Language	220
The Structure of Language	221
What Is Language?	223
Primates and Language	225
Structure of Vocal Cords	230
Infant Vocalization	231
Creole Languages	232
Genetics and Language	233
Brain Involvement	233
Summary	236
Study Resources	236
Review Questions	236
For Further Reading	237
Key Terms and Concepts	237
SAGE Study Site	237
Glossary Terms	237
8. Sex and Gender	239
Darwin and Sexual Selection	240
Sexuality	242
Biological Sex and Sexuality	242
Red Queen Hypothesis	244
Biological Foundations	245
Differential Evolutionary History	247
Overview of Gender Differences	250
Sexual Desire	252
Commitment	252
Sexuality and Aggression	253
Flexibility in Sexuality	253
Types of Mating Relationships	254
Primate Mating Systems	256
Gibbons	256
Gorillas	257

Chimpanzees	257
Bonobos	258
Summary	258
Study Resources	259
Review Questions	259
For Further Reading	260
Key Terms and Concepts	260
SAGE Study Site	260
Glossary Terms	260
9. Sexual Selection	261
Back to Darwin	261
Body Size and Mating Patterns	262
Mate Choice and the Evolution of Mental Abilities	263
Theoretical Perspectives on Sexual Preferences	263
Good Gene Theory	264
Good Provider Theory	264
Parental Investment and Sexual Strategies	265
Adding the Female Perspective to Darwin: Alternative to the Coy Female	266
Sexual Signals	267
Ensuring Paternity	270
Sexual Strategies Theory	270
Attraction	276
Summary	282
Study Resources	283
Review Questions	283
For Further Reading	283
Key Terms and Concepts	284
SAGE Study Site	284
Glossary Terms	284
10. Kin and Family Relationships	285
Kinship and Altruism	286
How Do We Determine Relationships?	288
The Structure of Relationships	291
Parental Investment Theory	293
Cooperative Breeding Model	294
Specific Caregivers	294
Kin Relationships Determine How We Reason	296
Conflict in the Family	299
Violence in the Family	299
Summary	304
Study Resources	304
Review Questions	304
For Further Reading	305
Key Terms and Concepts	305
SAGE Study Site	305
11. Social Relations	307
The Social Brain Hypothesis	309
Social Relations	310

Brain Processes Involved in Social Relations	313
Imitation Learning and Mirror Neurons	315
Social Interactions in Nonhuman Primates	317
Understanding Another Primate's World	318
Cooperation—Competition	319
Strong and Weak Altruism	319
Using Games to Study Cooperation	321
Indirect Reciprocity	323
Cheaters	324
Self-Deception	327
Brain Activity in Playing Games	328
Summary	329
Study Resources	329
Review Questions	329
For Further Reading	330
Key Terms and Concepts	330
SAGE Study Site	330
Glossary Terms	330

12. Making Social Decisions **331**

Social Contract Algorithms and Hazard Management Systems	331
Social Exchange and the Brain	336
The Logic of Cooperation	336
Implications in Social Psychology and Economics	337
Bounded Rationality	338
Heuristics	339
Framing	340
Decision Making and the Brain	341
Social and Moral Emotions	342
Moral Judgments	343
Interpersonal and Intragroup Violence	347
Summary	349
Study Resources	349
Review Questions	349
For Further Reading	350
Key Terms and Concepts	350
SAGE Study Site	350
Glossary Terms	350

PART III: APPLICATIONS

13. Health **353**

Vulnerability to Disorders	355
Bodily Defenses	357
Gene-Environment Interactions	358
Internal Milieu	361
Stress	361
Social Stress	366
Uncontrollable Stress	367
Does Fight-or-Flight Apply Equally to Males and Females?	367

Immune System	369
Sickness Behavior	371
Social Support Research	371
Coronary Heart Disease as a Means to Understanding Psychological Factors	373
Dominance	373
Cultural Changes in Health	375
Summary	376
Study Resources	377
Review Questions	377
For Further Reading	377
Key Terms and Concepts	378
SAGE Study Site	378
Glossary Terms	378
14. Psychopathology	379
Models of Psychopathology From an Evolutionary Perspective	381
Universal Psychopathology?	386
Historical Perspective on Psychopathology	388
Hughlings Jackson and MacLean	389
Freud	390
Jung	391
Bowlby	391
Jaak Panksepp	392
Psychopathology in the Context of Natural Functioning	393
Applying an Evolutionary Perspective to Psychopathology	394
Developing Fears	394
Depression	395
OCD	398
Schizophrenia	400
Abnormal Social Psychology	403
Summary	406
Study Resources	407
Review Questions	407
For Further Reading	408
Key Terms and Concepts	408
SAGE Study Site	408
Glossary Terms	408
15. Culture	409
Culture Develops as We See Ourselves in a Larger Context	409
Cultural Differences	411
Cultural Change	412
Culture and Technology	415
Interaction of Culture and Genes	415
Key Concepts in Studying Culture	
From an Evolutionary Perspective	416
John Tooby and Leda Cosmides:	
Evoked Versus Transmitted Culture	417
Robert Boyd and Peter Richerson	418
Edward O. Wilson and Charles Lumsden	420

Memes	422
Religion	423
Culture Determines Which Animals We Love, Which We Hate, and Which We Eat	425
Culture and the Brain	425
Culture Mapping	426
Source Analysis	427
Summary	428
Study Resources	429
Review Questions	429
For Further Reading	429
Key Terms and Concepts	430
SAGE Study Site	430
Glossary Terms	430
Glossary	431
References	447
Credits	473
Author Index	479
Subject Index	489
